

As a resident of my community in Arizona, the radio station AIR1 (88.7) has had an enormous affect on my life. I listen to it for several hours a day as well as the rest of my family. The station has provided me with quite a bit of spiritual guidance and encouragement.

Without this station, my family would be devastated. This is the only station that is suitable for my whole family. The station provides entertainment and encouragement that I count on everyday. There are many people who have changed their lives for the better because of a message they have heard on this station.

By having a positive station to listen to, people are being encouraged and are making choices to better their lives. The individuals on the station are very positive and passionate people who have helped so many people through the dialogue on the radio or by a listener calling in and seeking help. This station is extremely positive and it helps people all over the country. Additionally, through the contacts the station has, there are many world-wide needs that are being met through the listeners.
